EDUCATION

SRM University, KTR, Chennai

Chennai, India

B.Tech in Computer Science and Engineering (AI&ML)

2023 – 2027

- Current CGPA: 9.44

EXPERIENCE

Project Intern – ISD Lab

Chennai, India

SRM Institute of Science and Technology

Feb 2026 – Present

- Developing intelligent systems using machine learning and data-driven modeling techniques.
- Collaborating with research teams to design and evaluate AI-based solutions.
- Working on experimentation and implementation of intelligent system prototypes.

Undergraduate Researcher – SRM UROP Program

Chennai, India

SRM Institute of Science and Technology

2025 – Present

- Conducting research on simulation-based autonomous systems using Unreal Engine 5 and Cosys AirSim.
- Developing reinforcement learning control policies for autonomous navigation tasks in high-fidelity simulated environments.
- Designing reward functions, state representations, and benchmarking policy performance.
- Optimizing real-time simulation pipelines and system-level performance.

TECHNICAL SKILLS

Programming: Python, C, C++, Java, Dart (Flutter), TypeScript

AI / ML: Machine Learning, Deep Learning, Computer Vision, RAG Systems, Model Training & Evaluation

Frameworks & Tools: React 18, Vite, Linux, UNIX, MySQL, Git, Unreal Engine 5, Cosys AirSim

Systems: Linux System Administration, Performance Optimization, Kernel Fundamentals

CERTIFICATIONS

SAP Certified – Generative AI Developer

[View Credential](#)

2026

Course on Python – LIVEWIRE

[Show Credential](#)

Sept 2023

Course on Java – LIVEWIRE

[Show Credential](#)

Aug 2024

Linux Programming – SRMIST

[Show Credential](#)

Aug 2024

Data Science & Machine Learning – LIVEWIRE

[Ongoing](#)

PROJECTS

Cattle-Go

Computer Vision • Deep Learning • AgriTech

- AI livestock breed classification system using computer vision and deep learning.
- [View Repository](#)

Padayappa Paarvai

Software Tooling • Interactive UI

- JSON repository visualizer with interactive hierarchy and search features.
- [View Repository](#)
- [Live Demo](#)

Rule-Based Chatbot with UI	–
React • TypeScript • Conversational Systems	–
◦ Chatbot with rule engine and persistent conversation interface built using React and TypeScript.	
◦ View Repository	
Simulation-Based Reinforcement Learning for Autonomous Systems	–
Reinforcement Learning • Simulation • Control Systems	2025 – Present
◦ Reinforcement learning-based drone navigation in Unreal Engine 5 and AirSim simulation environments.	
◦ View Simulation Demo	

ACHIEVEMENTS

SRM SDG Hackathon – 3rd Place	Chennai
Organized by SRMIST	Nov 2024
NLH AI x Legal Hackathon – 2nd Runner-Up	Chennai
Madras Institute of Technology (Anna University)	Aug 2025

LANGUAGES

◦ English, Tamil, Hindi (Read & Write), Telugu (Elementary Proficiency)

INTERESTS

◦ Generative AI, Large Language Models (LLM)
◦ Kernel Development, System Performance Optimization, Software Development
